- 7th July:** Move up morning
- 8th July:** Camo Day
- W/C 11th July:** Maths Investigation week
- 14th July:** School Disco

Maths Investigation Week

We will be taking part in a Maths Investigation Week this half-term, for which your child will have the opportunity to apply their creativity and amazing year 3 learning to maths in a range of contexts.

We will be giving the children freedom to explore maths in this wide range of contexts in order to allow them to celebrate just how far they've come this year.

We are very proud of how much progress each and every one of them has made. Please make sure to ask them about Investigation Week to see what they have been learning.

Have a sneak peak into some of the exciting texts we'll be reading this half-term across our core and foundation topics.

Reminders

Please be aware that the heat within the classrooms is steadily increasing. For this reason, it is vital that your child comes into school **with a water bottle**.

Please also ensure that all your child's uniform (including jumpers) **are named** to ensure they can quickly be returned to them if they are found.

Finally, we understand the year is coming to an end; however, please ensure that children are coming into school **in the correct school uniform** (including appropriate PE kit). If you are unsure or have any questions regarding this, please check the school website or contact the school office.

Online safety

Please make sure that you are continuing to support your child's online safety by ensuring you are aware of the content that they are consuming online. If you have any questions about how to keep your child safe, please talk to their class teacher.

We have had a number of children who are accessing inappropriate and often frightening content on YouTube. Children in Year 3 should be restricted to the You Tube kids website rather than the standard site. Some of the children are also playing games with an age rating well above their actual age. Video games rated 12, 15 and 18 are not suitable for children in Year 3.

It is vital that you keep your child safe by ensuring their devices are restricted to content for their age, either through parental controls on these devices or by using parental control software.

We thank you so much for your continued hard work to keep your child safe in an ever-changing online world.
